

Safety for your production

cps Group

Your partner for industrial manufacturing

History

- 1996 Founding of cps Programmier-Service GmbH
- 1999 ISO 9001 certification
- 2006 Expansion of services: Taping of mechanical parts and special shapes
- 2007 Expansion through customer-specific logistics concepts
- 2008 Move to new, expanded production site with photovoltaic power supply
- 2019 Expansion through engineering department
- 2023 Expansion of production and storage facilities as well as photovoltaic system
- 2025 Expansion of services: Programming of current sensors

Service based on conviction

- We live and breathe customer focus, flexibility, and quality
- Our goal is to reduce our customers' manufacturing costs while maintaining absolute quality
- We tailor our services to our customers' projects and requirements
- Continuous investment and development in state-of-the-art technologies
- We operate in accordance with the principles of environmental protection and sustainability

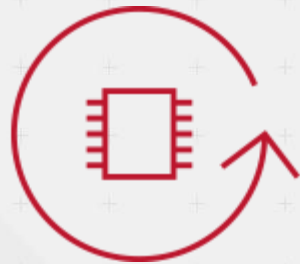

Norms & Standards

- ISO 9001 : 2015
- JEDEC 625 ESD protection programming
- JEDEC IEC-EN 60286 and EIA 481-C taping standard
- JEDEC J-STD-033B packaging standard

Services

Programming

Tape & Reel

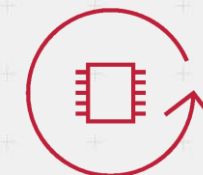

Programming service

Scope of service

- End-to-End programming service for semiconductors and sensors
 - Tray → Tray
 - Tray → Tape
 - Tape → Tape
- Laser marking & inline check (e.g. 3D coplanarity, marking check)
- Dry pack and MSL conforming handling
- Short response time for samples and pre-production series

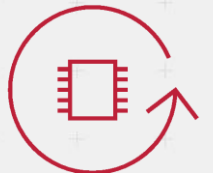

Programming service

Scope of service

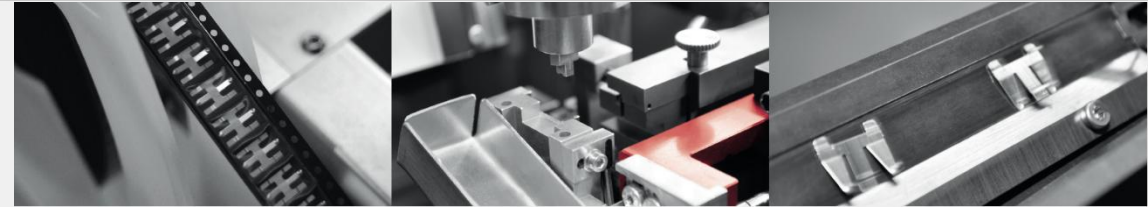

- Scalable quantities from prototypes to large series
- Special, flexible programming platforms with minimal setup times
- 24/7 availability for production-critical calls
- 100% traceability (component, batch, project, programming data)
- ISO 9001 : 2015 certified

Tape & Reel service

Scope of service

- Full automatic feeding systems
- Innovative feeding technology for the smallest, most complex parts
 - Detangling, separating, correct orientation, vision control during insertion
- Modular systems ensure the fastest response times
- Many years of experience in large and small projects
 - Short-term production of tools and belt material for customer-specific designs
 - Maximum degree of automation ensures consistent process control and quality
- High flexible packaging systems with short changeover times
- Tape & reel services and project development from small to large series
